DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1, 4, 12-13,16-18, 20, 27-29, drawn to an antagonist of PBR protein, or an antibody to PBR protein, and a method for treating cancer, using said antagonist or antibody.

Group 2, claim(s) 1-2, 4, 20, drawn to an antagonist of PBR nucleic acid, which is a ribozyme.

Group 3, claims 1, 3-4, 20, drawn to an antisense of PBR nucleic acid.

Group 4, claims 5-7, 16-18, drawn to a method for treating cancer, using an antisense of PBR nucleic acid.

Group 5, claims 8-11, drawn to a method for detecting cancer, using an antibody to PBR protein.

Group 6, claims 14, 30-31, drawn to a method for detecting cancer, using PBR nucleic acid.

Group 7, claims 15, 32-43, drawn to PBR nucleic acid, SEQ ID NO:1 or SEQ ID NO:2, and its oligonucleotides.

Application/Control Number: 09/646,932

Art Unit: 1642

Group 8, claims 16-19, drawn to a method for treating a disease having increased cell proliferation, or cancer, using a ribozyme.

Group 9, claim 21, drawn to a method for treating a disease having reduced cell proliferation, using PBR protein.

Group 10, claims 21-22, drawn to a method for treating a disease having reduced cell proliferation, using PBR nucleic acid.

Group 11, claim 23, drawn to a method for treating a disease having reduced cell proliferation, using a ligand of PBR protein.

Group 12, claims 24-26, drawn to an in vitro method for testing drug that effects PBR protein.

Group 13, claims 24-26, drawn to an in vitro method for testing drug that effects PBR nucleic acid.

Group 14, claims 35-36, drawn to a PBR-negative cell.

The inventions are distinct, each from the other because of the following reasons:

A national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept. When claims to different categories are present in the application, the claims will be considered to have unity of invention if the claims are drawn only to one of the following combinations of categories: (1) A product and a process specially adapted for the manufacture of said product; or (2) A product and a process of use of said product; or (3) A product, a process specially adapted for the manufacture of the said product, and a use of the said product; or (4) A process and an apparatus or means specifically

Art Unit: 1642

designed for carrying out the said process; or (5) A product, a process specially adapted for the manufacture of the said product, and an apparatus or means specifically designed for carrying out the said process. If multiple products, processes of manufacture or uses are claimed, the first invention of the category first mentioned in the claims of the application will be considered as the main invention in the claims, see PCT article 17(3) (a) and 1.476 (c), 37 C.F.R. 1.475(b) and (d). Group I will be the main invention. After that, all other products and methods will be broken out as separate groups (see 37 CFR 1.475(d).)

Group I, claims 1, 4, 12-13, 16-18, 20, 27-29 forms a single general inventive concept.

Groups 2-3, 7, 14 do not share the same technical feature of group I, because the composition of groups 2-3, 7, 14 do not share a common structure with the antibody to PBR of group I.

Groups 5, 11 are additional use of the antibody to or ligand of PBR of group I.

Groups 4, 6, 8, 9-10, 12-13 do not share the same technical feature of group I, because the methods of groups 4, 6, 8, 9-10, 12-13 do not use the antibody to PBR of group I.

Accordingly, Groups 1-14 are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Page 5

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MINH-TAM DAVIS whose telephone number is 571-272-0830. The examiner can normally be reached on 9:00 AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, SHANON FOLEY can be reached on 571-272-0898. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
